

Microsoft Teams integration

Easily reference and engage with your strategic plans directly from Microsoft Teams

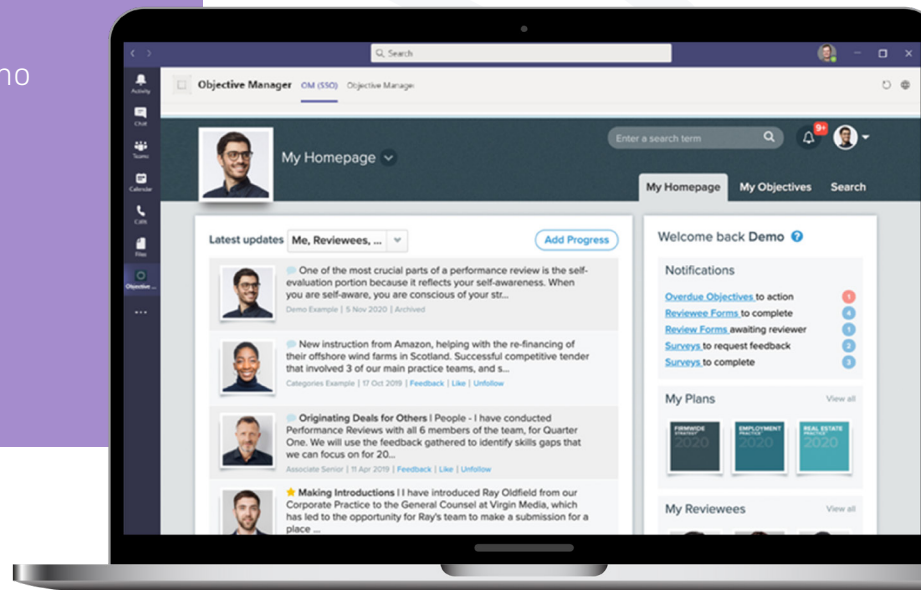

Microsoft Teams integration with Objective Manager makes it easy for individuals to quickly reference, engage, update and collaborate on their strategic plans and objectives without leaving Microsoft Teams.

Firm, sector, practice and client plans stored in Objective Manager can be accessed within the appropriate teams channels they are connected with, making the planning process relevant and easy for individuals to engage with. Users can access the full functionality of Objective Manager from a dedicated icon in Microsoft Teams meaning they no longer have to log-in to a separate application.

Access all of the Objective Manager functionality direct from Teams, with no further log-in required.

Quick and easy access to relevant plans directly from your existing Team Channels; including client, sector, practice and department channels.

Firm Benefits

- Easy access to plans will lead to increased engagement of individuals in the planning process.
- Plans are presented in the relevant context of an individual's daily work – available when they need it.
- Encourages colleagues to collaborate on strategic initiatives as well as their day-to-day work.
- Increase engagement and adoption of Objective Manager making it a richer experience for everyone involved.
